OTOKO Token Whitepaper

1. Project Overview

OTOKO Token is a decentralized cryptocurrency built on Binance Smart Chain (BSC).

Designed to power financial solutions, OTOKO integrates blockchain technology to create a secure, efficient,

and transparent ecosystem.

2. Tokenomics

- Token Name: OTOKO

- Symbol: OTK

- Blockchain: Binance Smart Chain (BEP-20)

- Total Supply: 100 Trillion OTK

- Contract Address: 0xe5636f3F660BbF4e4E88e570cC7A53a0a358f6c8

- No liquidity pool has been added yet.

3. Use Cases

OTOKO aims to be used in various financial applications, including:

- Decentralized Payments

- Smart Contract Utility

- Governance and Staking

4. Roadmap

- Q1 2025: Token Deployment (Completed)

- Q2 2025: CoinMarketCap & CoinGecko Listing (Pending)

- Q3 2025: Ecosystem Expansion and Partnerships

5. Security & Compliance

OTOKO follows best practices in smart contract development,

implementing ERC standards for security and efficiency. The contract is verified on BscScan and

ready for future audits if required.
